

Overview of your assignment process flow:

Find a data from an organizational memory → Understand the organization → Understand the data → prepare the data → Explore the Data (Descriptive Analysis) – Background study → Find/choose a problem based on the descriptive analysis outcomes → Set suitable objective(s) → perform data analysis(diagnostic, Source: Org. data) analysis → perform knowledge analysis(source: articles and theories) → perform Information analysis (Source: web documents, news articles, government reports, etc) → summarize all the findings → Critically evaluate with all the analysis outcomes → derive insights → make deliverables / solutions → complete and submit a report with all required contents.

Critical analysis and final deliverables:

How did you derive the final deliverable should be critically explained in the critical analysis section. With the help of Data Analysis findings, Knowledge analysis and Information analysis findings. You have to mix and match the findings and critically evaluate to derive the final deliverables.

Analysis Type	Data Source	Purpose	Methods	Tools
Data	Org. Data set. E.g. GBI BIG DBMS	Problem identification, background study (Descriptive) and reason findings (Diagnostic). Note: In the poster only reasons you identified from the data is required.	Descriptive Diagnostic	BI Tools such as Lumira Discovery, Power BI, Tableau, etc.
Information	Information Systems. Online Databases and Primary Data	Identify reasons and solutions		Brand24.com, Gen AI tools, Web Search Engines, etc.
Knowledge	Research Literatures, Proven Theories, and Company's Best practises.	Identify reasons and solutions		Tools within the Professional Databases.

Assignment Due Date: Will be informed later

Some content guidelines

Introduction:

You are required to develop a potential **report** as a part of this module requirements. There should be a clear connection made between your course learning outcomes and the chosen topic/problem/question. Basically, your report should clearly specify, **what** is your business problem/question/topic, **why** (significance of the problem & background/context), **how** you have created the insights, **what** is your strategies to solve the problem.

Report Elements

1. **Project Title:** The title should be clear and unambiguous, reflecting **what** your project is about.
2. **Introduction:** All the necessary basics and key terms should be briefed here, hence that a reader can understand your work. Clearly tell the problem background with visual justification.
3. **Problem statement / Definition / Question:** A precise, concise statement of your assignment problem / idea. This should serve as the basis for formulating your aim and/or objectives of your assignment. This should not be more than a few lines (not more than five lines is recommended) and should not have any references/citations.
 - Eg: 1. Why the first two quarters sales are low in GBI? (Not appropriate)
 - 2. The First half of the year the sales are low in GBI. (appropriate)
 - 3. Some customers are left from GBI. (appropriate)
 - 4. How to retain the customers in GBI? (Not appropriate)

Note: This section and the following section can be a part of Introduction.

4. **Aim & Objectives:** In your aim should reflect what you want to do in your assignment and in your objectives reflect why you want to do this assignment. Your objectives should be clear, achievable, and measurable. You will need to show that the aim is feasible, and so there should be enough evidence provided to allow a reader to make a reasoned judgement on this.

Aim: Should be a **generic** statement.

You can refer the title, deliverable & what your project is? to set the aim.

Eg: 1. The main aim of this assignment is to propose sales strategies for GBI - german-south.

2. The main aim of this assignment is to propose sales strategies for GBI.

Objective: Should be **specific, achievable, measurable & why this project?**

Eg: 1. The main objectives are:

➔ To improve the sales in GBI-german south.

➔ To improve the sales in GBI.

5. **Expected Deliverables:** Give a brief outline of your expected deliverable in relation to the said objectives. Add any further details now that the Proposal has been given more thought.

Your final deliverables can be one or more than of the following Items:

1. Guidelines / Recommendations /Strategies /Solutions
2. Scorecards / KPI's /Dashboards
3. Models (Not data models)
4. Report
5. Any other relevant items.

General Instruction:

- You can use any data analytical tools / applications / languages for your analysis process.
- Check the assignment marking scheme for marks allocated to each section.
- Regarding business understanding and data understanding, refer to the GBI scenario documents provided.
